

Let

3

the thought of another life but
these simply fascinate me.

We in Bligh had a
room flap on 10/24/80 which was
a very exciting time for me
being it my pet habitat.

If you have any past or
present sightings I shall be most
grateful so I can send them down
to the Society, I know there is
~~some~~ even a one for back as
1909 December up I don't remember
rightly, also may 1919 it's amazing
with it I wish I could find out
more in that field for my own
interest as well as the Society.

Hope you can be of help to
us, thanking you for your
kindly interest in this letter
hope you will let me know of
any new sightings in the near
future.
