 AGE/Date of Birth: Section 40 OCCUPATION: UNEMPLOYED
 ADDRESS: Section 40
 CITY/TOWN:
 COUNTY: POSTCODE:

This statement (consisting of two ^{in original} pages signed by me) is true to the best of my knowledge and belief and I make it knowing that, if it is tendered in evidence, I shall be liable to prosecution if I have stated in it anything which I know to be false or do not believe to be true.

Dated the 4th day of January, 1986 signed G. R. Horne.

STATEMENT OF WITNESS

(C.J. Act, 1967, s 9,
 M.C. Act, 1980, s 102,
 M.C. Rules, 1981, r 70)

About 0110am on Saturday 4th January 1986 I was at my home address when I let the dog out into the front garden. The dog had been out for a few minutes which is unusual at that time of night.

Section 40 I went into the front garden with my daughter, Section 40 15 yrs, and my son Section 40 12 years, to look for the dog. We had been stood in the garden for a approx two minutes when I saw a red coloured ball shaped object appear in the clear night sky from above my house and travel at a very fast speed towards Brighouse. Suddenly it disappeared from sight, but not behind any object or over the horizon. It just disappeared. The object was very high in the sky and the object was much larger than aircraft landing lights or similar objects. There was no noise whatsoever. The object was in sight for approx three seconds.

We all saw the object and continued to look into the sky. It was a very frosty and cold night and the sky was absolutely cloudless. We did not see anything for five minutes and so returned to the house. Due to pestering from the children we went back outside onto the adjoining Section 40 playing fields about 1.20 am. We had been looking at the sky for about five minutes when we saw another similar object appear from the sky about where the first one had disappeared. It went at great speed again and great height back towards the house. Again it was red and it just disappeared, again not behind any object or the horizon.

We studied the sky until 0230 hrs and in all we saw 11 (eleven) of these objects. The first two were as described, red, and the next nine were silver coloured and, I think, possibly a little smaller in size than the first two. This could have been because they were higher.

They always seemed to appear from the general area in which the last object had disappeared. There was approximately a five minute gap between the disappearance of one object and the appearance of the next and each sighting lasted some time between two and three
