To: The Air Ministry,  
Main Building,  
Ministry of Defence,  
Whitehall,  
London, SW1.

Dear Sir,

28th September 1984

Ref: Unusual light formation seen over Leeds, 23rd July 1984

With regard to the above incident. We are now in receipt, some seven weeks after requesting data, the Ministry of Defence's denial that they were in some way involved with the lights seen by many members of the public over Leeds, and surrounding districts that night.

Our enquires believe that the opposite is true, that either Gazelle or Lynx helicopters, from locations we have been in touch with, were involved in the testing of some form of powerful arc light, probably of the same nature used by Bedfordshire police in their hunt for the man known as the 'Fox'. We require a statement, given that we have collected enough data for this serious matter to be raised by the local authority in the form of the Leeds & Bradford Airport Authority, which will confirm our findings.

If the nature of the tests are so sensitive, then why carry them out over a city with a 750,000 plus population, and where we, as a Society will research the incident until the truth is known? I am aware that if proven, then prosecutions could result, for breaking Civil Aviation Authority rules about airspace etc. That is not for me to decide, what I am eager to do, is resolve who flew over the area that night, in what, why it was there at all, and just what on Earth is really going on with the continued shuttle service from the South of England northwards? If answers are to be forthcoming, I will be grateful, if not, then we shall continue with our efforts, through various quarters, until then, I remain,

Yours faithfully,

Section 40
