

Round Red/orange colored smoke issuing from him, Object
was ~~spinning~~ ^{spinning} on its own axis

Initially seen behind trees came from trees into cleared
area above road near to a house which has a white light
on its roof. - Object then went behind trees but could still
see glow then glow died. All three females waited up until
0300 hrs for another sighting but Object did not reappear

When object came into open it flew on two S shaped
courses

As a point of interest. I live in the area and as late as
weekend 14/15 June I have been told of previous sightings by a
neighbor - the neighbor knows I am employed on Flying Complaint
Duties
