

STATEMENT OF:.....

Section 40

Continued:

The lights stayed stationary for about four to five minutes.

After this time the lights seemed to move directly towards me.

The lights did not seem to get bigger or brighter but seemed to move at a very fast speed, quicker than an ordinary aeroplane would travel when seen at their normal height. The movements lasted about one minute and then stopped. They appeared to stop over the town centre of Huddersfield.

The two lights then zizzagged to the left and then to the right.

The objects then disappeared just like switching off a light.

There was a thin streak, weak light left in there place. This was not like the after image you get after looking at a bright light.

At no time could I see any object attached to these lights.

The two lights stayed close together in relation to each other.

The total duration of this sighting lasted about 8 to 10 minutes.

The weather during the sighting was fine. There were few clouds in the sky.

I have not seen anything like this before or since.
