Founder's Day at Hordie House School

The parents of nearly all the local day children from Hordle House Prep. School, at Milfordon-Sea, together with many boarders' parents who had made long journeys, went to the school on June 29th, for Foun-der's Day, and the main event der's Day, and the main event of the morning was a performance by some of the senior children of scenes from "The Merchant of Venice." At a previous performance, one of the infants from the Pre-Prep. School had been terrified by Shylock's realistic effort to get his pound of flesh from poor Antonio!

Country dancing by some of the junior children was sup-norted by rhythmic clapping from the enthusiastic parents, and the last set piece was an exhibition of aerobies by a group of barefoot girls.

The school was open for parents to walk round, and the working models and computer displays in the Science Laboratory attracted great interest. Most of these had been made by senior children, and the exhibition in the Art Department was much admired.

ment was much admired. Picnic lunches were eaten in the grounds, and the parents' cricket team, captained by Mr. Peter Tilly, home on leave from Nigeria, was defeated by the school lst XI, by 16 runs. The balance of parental power was restored by the ladies' shooting team storing 357 against the school's 296, and justice was maintained by the justice was maintained by the tennis match ending in a draw.

It's happened again! The Mystery Circles have returned. Nobody knows why or whence they come, but every year since the last war, the perfectly regular circles have appeared somewhere. For the last live or six years, they have materialised between Alresford and Winchester, first at Cheesefoot Head, this year at Matterley Farm, just off the A31. Similar phenomena have been reported in Australia, Canada, Sweden and in other parts of the British fsles including Wesf-bury and Warminster. The largest in this group is about 40 feet across, the rest are 11 or 12 feet. In each the corn is swirted clockwise round the rings, whilst outside it is untouched. Normally — It anything about them can be called normal — they are in this configuration, the largest in the centie of a square, the smaller at each corner, although in 1982 at Cheesefoot, there were only three in a straight line. Theories abound about the cause, from Vandalism to UFOs, by way of micro-tornadoes. The truth is, we just don't know, but if they run true to form they will be back next year...
